Profile

Currently my practice emphasizes Orthopedic Acupuncture and Internal Chinese Medicine. Orthopedic Acupuncture can relieve nerve, joint and muscular pain; reduce the need for pain medication; reduce the intensity, frequency and duration of pain; increase range of motion and function. Chinese Medicine is a ancient practice and diagnostic model that utilizes the tools of acupuncture, herbs, nutrition, and exercise to bring the body back to homeostasis and health. Chinese medicine can help with general vitality, stress reduction, improved digestion and enhanced energy.

Experience

Proprietor, CTC Acupuncture, Capitola, CA – May 2015 - Present

Licensed Acupuncturist with a specialty in sports and orthopedic acupuncture, focusing on neuromuscular issues using Muscle Channel Technique (MCT), Trigger Point Therapy and pain management skills. Herbalist with an emphasis on Chinese herb formulas and diagnostic theory
